Company Background

Quantome LLC is a minority-owned cybersecurity consulting that offers comprehensive cybersecurity solutions and develops an expert approach to prevent attack techniques used to compromise critical IT assets across organizations, and government agencies, whether hybrid, on-premises, or multi-cloud. Ensuring a secure modern hybrid environment, with Advanced analytics, threat and behavior we can detect, respond, and remediate faster, better, and scale with continuous visibility to reduce risk and attack surface.

Our top tier team fuels on cyber security challenges. Optimizing business activities, processes, operations, compute and network security to achievable outcomes in a strategic and prioritized way. Providing full visibility into unmanaged/managed systems, Internet of Things (IoT) and Industrial Internet of Things (IIoT) devices, network systems with complete automated security validation and prioritized remediation.

Why Quantome ?

Over 18 years with global experience in Information Technology, Cybersecurity intelligence, and identity protection and Cloud:

- ⌚ Complex problem solving with significant security domain expertise in security operations, endpoint security, network security and cloud-native protection
- ⌚ Complex problem solving with significant security domain expertise in security operations, endpoint security, network security and cloud-native protection
- ⌚ Developing IAM teams and processes to achieve organizational success
- ⌚ Experience in designing and implementing enterprise wide Identity and Access Management and optimizing Cloud security services
- ⌚ Proven ability to control costs, meet deadline and achieve results

Core Competencies:

- ⌚ Cloud Security Posture Management (CSPM)
- ⌚ Modern Security Security Stack for Cloud
- ⌚ IT Security / IT workforce augmentation
- ⌚ Vulnerability Management Services
- ⌚ Web Application and API Security
- ⌚ Identity and Access Management
- ⌚ Zero Trust Network
- ⌚ Systems Design

Expertise

Past Projects:

- ✔ Develop and Architect Cloud-First Security Model with deep visibility control and remediation on any endpoint
- ✔ Identity and Access Management - Architect, Design and Simplify identity lifecycle and implement Single Sign-On to include Next-Gen IAM to support Cloud initiatives (Azure/AWS) and Mobile Device Management
- ✔ Cloud and Data Connectivity - Design, build and manage Private/Public Cloud
- ✔ Web Application Firewall and Next Gen Firewall Implementation – Resulting in 20% decrease of security risks
